Responsible AI Companionship

AI & Learning

AI for Sustainable Development

WHAT SCHOOLS GET

- How can I evaluate my students effectively & fairly in an AI-age?
- How can I make my students feel included in decision-making about AI tools?
- How do I know which tools or trainings to give students first when it comes to AI?

Kigumi Lab is a fun way for kids to learn about AI ethics and human intelligences while also proactively helping schools identify how students are thinking about and using AI so that you can make data-driven decisions.
